*Election/Restriction*

Restriction to one of the following inventions is required under 35 U.S.C. § 121:

I. Claims 1-4 drawn to a method for loading and exchanging rollers in a printing machine, classified in class 101, subclass 483.

II. Claims 5-14, drawn to an apparatus for loading and exchanging the rollers of printing units of a printing machine, classified in class 101, subclass 153.

Inventions of Group I and Group II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process of Group I as claimed can be practiced by another materially different apparatus such as loading and exchanging cutters in machine tools such as a lathe machine or a drill press or by hand. The apparatus as claimed can be used to load a new web roller in a printing press.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classifications restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 2854

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
